## PREFACE.

---

It is only twenty or thirty years since the Japanese Ukiyoye was first revealed to foreign eyes, but its influence has been so wide and great that it is said it has brought about something of a revolution in the world's decorative art. So much has been investigated and so many volumes have been written of that unique art, by eminent professors or art-lovers of America and Europe, that it is scarcely necessary to dilate on it. The fact that, since last autumn, when I was the first in this city to start in dealing in Ukiyoye works, so many stores in the same line of business have sprung up here, well shows, I remark with pleasure, in this part of America, lovers and collectors of Ukiyoye are fast increasing. But such lovers and collectors, as well as dealers, must have experienced much difficulty in finding or disinterring any good specimens of the art. They are getting scarce and scarce, and their collection is now the hardest work in the native country as well as abroad—especially so, if one tries to collect a somewhat complete series from the beginning down to the end of Ukiyoye.

Fortunately it has been my special task during the last more than twenty years to collect any hidden treasures of the art, and my long and quite expensive efforts have been so successful that now I take pride in possessing one of the best and largest collections of Ukiyoye in the world.

At the instigation of certain enthusiasts here, I have brought over this time some eight hundred choice specimens of colored prints to be shown to the lovers and collectors here. Truly they are part of the pith of my stock, having been selected out of so many thousand good works. As described in this catalogue, they comprise all the leading artists of the school from Moronobu, the founder, down to Hiroshige, the last of the greatest, and will give, I believe, a fine chance to the lovers and students here for making an historical study of the art.
